

# Greater Los Angeles County Region Integrated Regional Water Management Plan

## Greater Los Angeles County Region

The Greater Los Angeles County Region, comprised of 5 sub-regions, spans from Ventura County to Orange County, and from the coastline to the San Gabriel Mountains - an area representing over 10 million people and over 2,200 square miles.

- Consists of approximately 28% of the State's entire population.
- Encompasses 92 cities.
- Has extremely complex water quality and water supply issues.
- Water is one of the Region's most valuable resources.

### PURPOSE:

- Use Water Efficiently
- Protect Water Quality
- Support Environmental Stewardship

## IRWMP Objectives:

- Optimize local water resources to reduce the reliance on imported water
- Improve the quality of urban runoff, stormwater, and wastewater
- Protect and improve groundwater and drinking water quality
- Increase watershed friendly recreational space
- Protect, restore, and enhance natural processes and habitats
- Maintain and enhance flood protection
- Maintain and enhance public infrastructure related to water resources and water quality

## Integrated Regional Water Management

*An integrated approach to water management is the way to address a broad range of water resource management issues, competing water demands, water supply reliability, and financing of projects. Hundreds of local agencies, organizations, cities, and county governments are participating in the Integrated Regional Water Management Plan (IRWMP) effort for the Greater Los Angeles County Region that is inclusive and provides opportunities for cost-effective solutions to address the water resource needs of the Region. The IRWMP will serve to position the Region for obtaining funding from local, State, and Federal sources to implement projects.*
